EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science (Cloud Computing) – CGPA: 7.97 / 10.0 (No Backlogs)

Chennai, TN

2023 – 2027

Delhi Public School

Class XII (CBSE): 83.4% | Class X (CBSE): 90.2%

Jodhpur, RJ

2021 – 2023

TECHNICAL SKILLS

Core Programming & Engineering: Python, C++, Java, SQL, Linux, Yaml, Data Structures, Algorithms

Cloud, DevOps & Release Planning: AWS (EC2, Lambda, S3, VPC, SageMaker), Docker, Terraform, CI/CD Pipelines, Git, GitHub Actions, Jenkins

Software Architecture & Data Systems: PySpark, AWS Glue, PostgreSQL, Relational Data Modeling (1NF-BCNF), REST APIs

Experimental AI & Innovation: Responsible AI Workflows, LLM Integration, Prompt Engineering, Predictive Modeling

Best Practices & Methods: Software Development Lifecycle (SDLC), Agile/Scrum, System Verification, Reliability, Strategic Problem-Solving

EXPERIENCE

Wissen Technology

Technical Intern – Cloud Engineering & AI Initiatives

Bangalore, India

Jul 21, 2026 – Present

- Building cloud infrastructure automation and enterprise data orchestration pipelines.
- Contributing to internal release planning and deployment workflows utilizing Terraform and GitOps to enforce strict engineering standards.
- Supporting multi-VM staging environments and building containerized applications (Docker) to optimize system reliability and software scaling.

ENGINEERING PROJECTS

Smart Serverless Web App & Experimental AI Systems | *Next.js, SageMaker, Lambda, n8n*

- Participated in system specification and design of a SaaS platform, using AWS Glue and PySpark to build data pipelines that reduced latency.
- Applied experimental AI by integrating a SageMaker KNN model via REST APIs for real-time recommendations and operational efficiency.

Automated Deployment Pipeline & Release Management | *AWS EKS, Jenkins, Terraform, GitOps*

- Wrote high-quality software and IaC scripts with Terraform and Jenkins to automate environment provisioning and release planning.
- Implemented custom validation safeguards within CI/CD workflows to accelerate continuous recovery and boost team collaboration under tight deadlines.

IoT Secure Stream Cipher Protocol & System Architecture | *ESP32, C++, ChaCha20, Agile*

- Implemented a lightweight 256-bit encryption protocol in C++ for hardware nodes, executing direct driver code for high-performance data transfers.

- Architected an asynchronous nonce-synchronization scheme to minimize data overhead, collaborating in an Agile team across structured sprints.

Corporate Financial Data Warehouse & System Modeling | *SQL, Data Modeling, PostgreSQL*

- Designed a normalized (BCNF) relational schema from first principles to support strategic analytics and reduce redundancy by 35%.
- Built backend logging and audit validation workflows using transactional triggers and cursors to ensure continuous reliability and data governance.

CERTIFICATIONS & LEADERSHIP

Certifications: Cisco Certified Ethical Hacker; Python and SQL for Data Analytics, GitHub CoPilot-300.

Strategic Leadership & Values: School Head Boy (managed student operations); MUN Organizing Committee (Delegate Affairs Team); National-level Cycle Polo athlete proving collaborative teamwork.
