EDUCATION

SRM Institute of Science and Technology

Chennai, TN

B.Tech in Computer Science (Cloud Computing) – CGPA: 7.97 / 10.0

2023 – 2027

Delhi Public School

Jodhpur, RJ

Class XII (CBSE): 83.4% | Class X (CBSE): 90.2%

2021 – 2023

TECHNICAL SKILLS

Cloud & DevOps: AWS (EC2, Lambda, S3, VPC, Cognito, DynamoDB, SageMaker), Git, GitHub Actions, Jenkins, ArgoCD, Terraform (IaC), Docker, Ansible, n8n

Data Orchestration: PySpark, AWS Glue, ETL/ELT Pipelines, Relational Data Modeling (1NF-BCNF)

Languages & Frameworks: Python, SQL, Next.js, React.js, REST APIs, Microservices

AI & Security: Prompt Engineering, LLM Integration, Cisco Certified Ethical Hacker fundamentals

Practices: Agile/Scrum, SDLC, Design Thinking, Team Collaboration

EXPERIENCE

Wissen Technology

Bangalore, India

Technical Intern – Cloud Engineering & AI Initiatives

Jul 21, 2026 – Present

Contributing to cloud infrastructure automation and enterprise data orchestration pipelines following a technical selection process.

Supporting internal deployment workflows using Terraform and GitOps practices to maintain reliable version control.

Working with multi-VM staging environments and containerized applications (Docker) to support system scaling.

ENGINEERING PROJECTS

Smart Serverless Web App & Workflow Automation | *Next.js, SageMaker, Lambda, n8n*

Designed an end-to-end SaaS platform connecting a Next.js frontend to automated backend data workflows built with AWS Glue and PySpark, improving file ingestion speed and pipeline latency.

Integrated a SageMaker KNN model to power real-time contextual recommendations and implemented optimistic UI updates for improved client-side responsiveness.

Automated Infrastructure & CI/CD Pipeline | *AWS EKS, Jenkins, Terraform, GitOps*

Built infrastructure-as-code with Terraform and Jenkins to automate environment provisioning, change management, and validation rollbacks.

Routed pipeline telemetry into Slack to improve system visibility and speed up resolution for cross-functional engineering teams.

IoT Secure Stream Cipher Protocol | *ESP32, ChaCha20, Agile*

Implemented a lightweight 256-bit encryption protocol for resource-constrained IoT devices alongside an asynchronous nonce-synchronization scheme to reduce packet overhead.

Managed project development in a peer team environment using Agile/Scrum, tracking cross-node testing targets across structured sprints on MS Planner.

Corporate Customer Data Warehouse | *SQL, Data Modeling, ETL*

Designed a normalized (BCNF) relational schema from first principles to minimize redundancy, simplify query paths, and support backend logging workflows using triggers.

CERTIFICATIONS & LEADERSHIP

Certifications: Cisco Certified Ethical Hacker; AWS Certified Solutions Architect (in progress); Python and SQL for Data Analytics.

Leadership: School Head Boy (student operations lead); MUN Organizing Committee (delegate communications); National-level Cycle Polo athlete.
