EDUCATION

SRM Institute of Science and Technology

Chennai, TN

B.Tech in Computer Science (Cloud Computing) – CGPA: 7.97 / 10.0

2023 – 2027

Delhi Public School

Jodhpur, RJ

Class XII (CBSE): 83.4% | Class X (CBSE): 90.2%

2021 – 2023

TECHNICAL SKILLS

DevOps & Automation: Git, GitHub Actions, Jenkins, ArgoCD, Terraform, Docker, Ansible, n8n

Cloud & Security: AWS (EC2, Lambda, S3, VPC, Cognito, DynamoDB, SageMaker), Prompt Engineering, LLM Integration, Ethical Hacking Fundamentals

Data Engineering: Python, SQL, PySpark, AWS Glue, Relational Data Modeling (1NF-BCNF), ETL/ELT Pipelines

Practices & Tools: Agile/Scrum, REST APIs, Microservices, Design Thinking, Slack, Microsoft Teams

EXPERIENCE

Zetheta Algorithms

Bangalore, India (Remote)

Cloud DevOps Engineering Extern

Jul 2026 – Present

Contributing to a multi-stage CI/CD pipeline (GitHub Actions, ArgoCD) for a banking-domain project, including integration of automated security scanning steps (SAST/DAST) aligned with common compliance frameworks.

Assisting in designing a zero-downtime schema migration approach for large PostgreSQL tables using an expand-contract pattern, coordinated with canary-style rollout via Istio.

Supporting design of a multi-region disaster recovery strategy using AWS Aurora Global Database and DynamoDB cross-region replication, focused on reducing recovery time and data loss windows.

ENGINEERING PROJECTS

Smart Serverless Web App & Workflow Automation | *Next.js, SageMaker, Lambda, n8n*

Designed an end-to-end SaaS platform connecting a Next.js frontend to automated backend data workflows built with AWS Glue and PySpark, improving file ingestion speed and reducing pipeline latency.

Integrated a SageMaker KNN model to power real-time contextual recommendations within the app.

Implemented global state management and optimistic UI updates to improve perceived responsiveness.

Automated Infrastructure & CI/CD Pipeline | *AWS EKS, Jenkins, Terraform, GitOps*

Built infrastructure-as-code with Terraform and Jenkins to automate environment provisioning and change management.

Created custom validation checks to speed up automated rollback during pipeline failures.

Routed pipeline telemetry to Slack to improve visibility and reduce time-to-response for cross-functional engineering teams.

IoT Secure Stream Cipher Protocol | *ESP32, ChaCha20, Agile*

Implemented a lightweight 256-bit end-to-end encryption protocol for resource-constrained IoT devices, avoiding traditional blocking middleware.

Designed an asynchronous nonce-synchronization scheme to reduce packet overhead.

Managed project development in a peer team environment using Agile/Scrum, tracking tasks and cross-node testing targets across structured sprints on MS Planner.

Corporate Customer Data Warehouse | *SQL, Data Modeling, ETL*

Designed a normalized (BCNF) relational schema from first principles to reduce data redundancy and simplify query paths.

Built backend logging and validation workflows using transactional triggers and cursors to support audit requirements.

CERTIFICATIONS & LEADERSHIP

Certifications: Cisco Certified Ethical Hacker; AWS Certified Solutions Architect (in progress); Python and SQL for Data Analytics.

Leadership: School Head Boy (student operations lead); MUN Organizing Committee (delegate communications); National-level Cycle Polo athlete.
