EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science (Cloud Computing) – CGPA: 7.97 / 10.0 (No Backlogs)

Chennai, TN

2023 – 2027

Delhi Public School

Class XII (CBSE): 83.4% | Class X (CBSE): 90.2%

Jodhpur, RJ

2021 – 2023

TECHNICAL SKILLS & CORE COMPETENCIES

Cloud Infrastructure & IaC: AWS (EKS, EC2, S3, Lambda, IAM, VPC), Azure, Terraform, CloudFormation, Linux, Bash

DevOps, CI/CD: Docker, Kubernetes, Jenkins, GitHub Actions, ArgoCD, Prometheus, Grafana

Data Engineering & Pipelines: PySpark, Apache Kafka, AWS Glue, Snowflake, ETL/ELT Architectures

Databases & Storage: PostgreSQL, MySQL, DynamoDB, Redis, Relational Modeling (1NF–BCNF), Query Optimization

Languages & Developer Tools: Python, SQL, C++, Java, Git/GitHub, Jira, Agile/Scrum, REST APIs

EXPERIENCE

Wissen Technology

Bangalore, India

Technical Intern – Cloud Engineering & Data Initiatives

Jul 21, 2026 – Aug 20, 2026

Shadowed and contributed to Agile SDLC workflows, resolving assigned cloud configuration and setup tickets via Jira and collaborating on Git PR reviews.

Assisted in data pipeline optimization, profiling SQL transformation queries and staging workflows on Snowflake to analyze query execution bottlenecks.

Configured monitoring dashboards in Grafana, connecting Prometheus metrics to track container resource utilization, pod restart events, and service latency.

ENGINEERING PROJECTS

Resilient Blue-Green CI/CD Pipeline & Container Orchestration | AWS EKS, Terraform, Docker, Jenkins, ArgoCD

Provisioned 60+ AWS cloud resources (custom VPC, multi-AZ subnets, IAM, EKS) using Terraform, integrating Cluster Autoscaler to scale worker nodes (1 to 3 nodes) dynamically.

Architected a 9-stage declarative Jenkins CI/CD pipeline enforcing automated SAST/DAST security quality gates via SonarQube and OWASP ZAP to block high-risk vulnerabilities.

Achieved 100% zero-downtime releases via Argo Rollouts with automated 15-second health checks (HTTP 200 OK) and zero-impact auto-rollback upon latency spikes ($> 500ms$).

Cloud-Native Music SaaS & Recommendation Platform | Python, PySpark, AWS Glue, Lambda, DynamoDB, SageMaker

Reduced recommendation latency by 38% (420ms to 260ms) and maintained 99.9% API availability by deploying an async re-ranking Lambda pipeline with top-K caching in DynamoDB.

Cut network payload by 72% (3.2MB to $\sim 900KB$) by building an AWS Glue and Librosa ETL pipeline to pre-slice 10-second peak-energy audio preview hooks.

Corporate Financial Database & Transaction Management | SQL, Relational Data Modeling, PostgreSQL

Designed a normalized (BCNF) schema with 14 relational tables to reduce redundant record storage across 100+ mock transactions.

Authored 10+ stored procedures, index strategies, and ACID-compliant triggers to support an auditable transaction log.

IoT Cryptographic Protocol & Embedded Software | C++, ESP32, LoRa, ChaCha20-Poly1305, Python

Engineered an encrypted LoRa P2P protocol on dual ESP32 nodes using ChaCha20-Poly1305 and X25519 ECDH, achieving 0.09ms mean encryption latency and 3.5ms total pipeline overhead.

Optimized framing to 30 bytes (21-byte headroom under 51-byte LoRa limit), sustaining 100% decryption success rate under 20% simulated channel packet loss; streamed telemetry to a Python host GUI at 115200 baud.

CERTIFICATIONS & LEADERSHIP

Certifications: Cisco Certified Ethical Hacker; Python and SQL for Data Analytics; GitHub CoPilot-300; AWS Solutions Architect, Snowflake Snowpro Core, Azure Administrator (Training Certifications).

Leadership & Collaboration: School Head Boy (managed student operations with cross-functional leadership); MUN Committee Lead; National level Cycle Polo Athlete, District level Badminton and Basketball Player.
