EDUCATION

SRM Institute of Science and Technology

Chennai, TN

B.Tech in Computer Science (Cloud Computing) – CGPA: 7.97 / 10.0

2023 – 2027

Delhi Public School

Jodhpur, RJ

Class XII (CBSE): 83.4% | Class X (CBSE): 90.2%

2021 – 2023

TECHNICAL SKILLS

Cloud Infrastructure: AWS (EC2, Lambda, S3, VPC, Cognito, DynamoDB, SageMaker) – infrastructure automation, cloud-native application deployment

Automation & IaC: Terraform (Infrastructure as Code), Docker, Kubernetes (fundamentals), Ansible, GitOps, n8n

CI/CD & DevOps: Git, GitHub Actions, Jenkins, ArgoCD, CI/CD pipeline design, Agile/Scrum

Cloud Security & Networking: IAM, RBAC, TCP/IP, DNS, HTTP/HTTPS, CloudWatch monitoring

Programming & APIs: Python, SQL, REST APIs, Microservices architecture

Data Engineering: PySpark, AWS Glue, ETL/ELT Pipelines, Relational Data Modeling (1NF-BCNF)

AI & Security Fundamentals: Prompt Engineering, LLM Integration, Cisco Certified Ethical Hacker fundamentals

EXPERIENCE

Wissen Technology

Bangalore, India

Technical Intern – Cloud Engineering & AI Initiatives

Jul 21, 2026 – Present

Contributing to cloud infrastructure automation and enterprise data orchestration pipelines.

Supporting CI/CD deployment workflows using Terraform and GitOps practices to maintain reliable, automated version control.

Working with multi-VM staging environments and containerized applications (Docker) to support cloud-native system scaling.

ENGINEERING PROJECTS

Smart Serverless Web App & Workflow Automation | Next.js, AWS SageMaker, Lambda, n8n

Designed an end-to-end cloud-native SaaS platform connecting a Next.js frontend to automated backend data workflows built with AWS Glue and PySpark, improving file ingestion speed and pipeline latency.

Integrated a SageMaker model via REST APIs to power real-time contextual recommendations within the application.

Automated Cloud Infrastructure & CI/CD Pipeline | AWS EKS, Jenkins, Terraform, GitOps

Built Infrastructure as Code with Terraform and Jenkins to automate cloud environment provisioning, change management, and validation rollbacks.

Routed pipeline telemetry into Slack to improve infrastructure visibility and speed up incident resolution for cross-functional engineering teams.

IoT Secure Stream Cipher Protocol | ESP32, ChaCha20, Agile

Implemented a lightweight 256-bit encryption protocol for resource-constrained IoT devices alongside an asynchronous nonce-synchronization scheme to reduce packet overhead.

Managed project development in a peer team environment using Agile/Scrum, tracking cross-node testing targets across structured sprints on MS Planner.

Corporate Customer Data Warehouse | SQL, Data Modeling, ETL

Designed a normalized (BCNF) relational schema from first principles to minimize redundancy, simplify query paths, and support backend logging workflows using triggers.

CERTIFICATIONS & LEADERSHIP

Certifications: Cisco Certified Ethical Hacker; Python and SQL for Data Analytics.

Leadership: School Head Boy (student operations lead); MUN Organizing Committee (delegate communications); National-level Cycle Polo athlete.
