EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science (Cloud Computing)

Chennai, TN

2023 – 2027

Delhi Public School

Class XII (CBSE): 83.4% — Class X (CBSE): 90.2%

Jodhpur, RJ

2021 – 2023

TECHNICAL SKILLS & COMPETENCIES

DevOps & Automation: GitOps, Jenkins, GitHub Actions, ArgoCD, Terraform, Docker, Ansible, n8n SaaS, Intelligent Workflows
Cloud, Security & AI: AWS (EC2, Lambda, S3, VPC, Cognito, DynamoDB, SageMaker), LLMs, Prompt Eng., Cisco Ethical Hacker

Data Engineering & Modeling: Python, SQL, PySpark, AWS Glue, DBMS, Normalization (1NF-BCNF), ETL/ELT Pipelines, Excel

Frameworks & Methods: Design/Product Thinking, First Principles, Agile (Scrum), Git, Slack, Teams, REST APIs, Microservices

EXPERIENCE

Zetheta Algorithms

Bangalore, India (Remote)

Cloud DevOps Engineering Extern

July 2026 – Present

- Architected an 8-stage banking CI/CD pipeline using GitHub Actions and ArgoCD to reduce commit-to-production time **under 2 hours**; embedded parallel SAST/DAST compliance gates mapped to RBI and PCI-DSS v4.0 mandates.
- Implemented an expand-contract framework with throttled batch updates to safely deploy database schema changes on **100M+ row PostgreSQL tables** without table locks, coordinated alongside Istio canary routing.
- Engineered a multi-region active-active disaster recovery architecture utilizing AWS Aurora Global Databases and DynamoDB cross-region replication, achieving targets of **RTO < 5 mins** and **RPO < 1 min**.

ENGINEERING & PROCESS TRANSFORMATION PROJECTS

Smart Serverless Web App & Workflow Automation | Next.js, SageMaker, Lambda, n8n

- Owned end-to-end design of an AI-native SaaS platform, integrating user-centric frontends with automated backend data workflows via AWS Glue and PySpark to increase file ingestion speeds by **30%** and lower pipeline latency by **25%**.
- Deployed a SageMaker KNN machine learning model for real-time contextual suggestions, driving a **20% discovery boost**.
- Utilized design thinking to build a Next.js UI with global state tracking and optimistic updates to maximize feedback loops.

Automated Infrastructure & Operational CI/CD Pipeline | AWS EKS, Jenkins, Terraform, GitOps

- Designed a scalable infrastructure via Terraform and Jenkins to automate change management and ensure **100% application availability**.
- Programmed custom check templates that cut automated validation and rollback execution times to **under 60 seconds** during live faults.
- Bridged technical architecture with team workflows by routing telemetry to Slack, accelerating resolution speeds by **40%**.

IoT System Design: Secure Stream Cipher Protocol | ESP32, ChaCha20, Agile Product Management

- Developed a 256-bit lightweight E2EE protocol for resource-constrained hardware nodes without traditional blocking middleware.
- Architected an asynchronous 96-bit Dynamic Nonce synchronization pipeline, wiping out **20% packet bloat** data overhead.
- Managed the life cycle via Agile Scrum methodologies, converting process bottlenecks to backlogs for an **18% energy boost**.

Corporate Customer Data Platform Warehouse | SQL, Analytical Data Modeling, ETL Triggers

- Designed a robust BCNF-normalized schema from first principles, optimizing query paths and dropping data redundancy by **35%**.
- Automated backend logging and validation workflows utilizing transactional triggers and cursors to ensure tight audit compliance.

CERTIFICATIONS, LEADERSHIP & INTERPERSONAL SKILLS

Certifications: Cisco Certified Ethical Hacker; Pursuing AWS Solutions Architect Designation; Python and SQL Data Analytics.

Leadership & Impact: Selected as School Head Boy managing operations; served on MUN Organizing Team directing delegate communications; National-level Athlete (Cycle Polo).
